“WE ARE FREE” “(BOOM ❤️),” which I see being conveyed as simply: there are a lot of inputs or variables that create or go into an economy, similar to a cake. In any cake since Hammurabi’s Code—History Note: the first time we all got together and said, “Hello, so even if I do not like you just a little bit, or opposite, hey, I think you are the neatest, maybe if we work together in a community, we can create what is called more productivity as a group, giving all of us more food/housing/comfort. I’m sure more comfort was a big plus.” And we did just that as a community, creating my personal favorite—sorry, economic wonk here 💪 jk jk jk—the first-ever known RECEIPTS!! *In clay, if I recall correctly. The receipts, in fact, being why we hold as true, as much as we are able to validate as true today, Hammurabi’s Code and community as the first concept driven to successful implementation of an economy model/idea on the globe, which was employed or put to work to give us more comfort, food, etc.

Return to the cake modeling an economy since Hammurabi’s Code and community, in my opinion, a very, very long time ago… *time is relative. Two inputs required for any form of an economy to run or function have been: 1.) Human Labor and 2.) Human Time, regardless of which economy you found yourself in. “Boom Boom Boom,” you are born in the time of kings and queens; the economy required the inputs of Human Labor and Human Time. “Boom Boom Boom,” you are born in the time of the Transatlantic Slave Trade; the inputs of the economy are 1.) Human Labor and 2.) Human Time. “Boom Boom Boom,” you are born in Ancient China; the inputs of the economy are 1.) Human Labor and 2.) Human Time.

Since Hammurabi’s Code and community, human labor and human time have been required to operate an economy. Simple enough, right? We go to work in whatever time of history we find ourselves in and produce productivity for the economy that could look like a welder welding, an accountant balancing books for clients, or any of the myriad of tasks that we humans perform via labor and our time for the community, in this example, the USA 🇺🇸. Similar to how a cake, since the beginning of time, has always taken eggs and flour… you can mix in sprinkles one time or chocolate another, but two inputs are always eggs and flour.

Well, my friends and probably most likely enemies creeping around my share with you—because you know people… yeah, I know people… lol lol. The inputs of Human Labor and Human Time are effectively no longer required, or actually, per U.S. Code requirements of business to their owners, as far as the number one rule being profit for the owners, etc., to be removed in a timely, comfortable, academically backed-by-evidence, i.e., RECEIPTS! 🙂, and, in short order, completely. The corporations do not have a choice, in my estimation. The same law that required our beloved, smart, and oh-so-yummy Martha Stewart to go to prison are the same laws that hold this requirement to the feet of corporations, even if they didn’t want to move. And we didn’t even want Martha Stewart to go to prison; we loved her. Plus, she is a celebrity, blonde, wealthy, all of that. Regardless, the police didn’t even want to take her, but they sadly did. Cops are awesome and brave for us most of the time—you know people… I know people…

Okay, very important team: first, low key… but quietly high key, “WE ARE FREE” “(BOOM ❤️).” Second, this is only a “WE ARE FREE” (“BOOM ❤️”) if that is what we make it, because you know people… I know people. Flashback: TOILET PAPER 🥲. Also, we have all stopped working before, and that was also very sad. One time in history that many may know is the “D.” of the 1940s. If you don’t know, the first rule of economics, or living in an economy, is that you never say the full “D.” word for safe measure because you know people… I know people. So that is a thing we do.

Or alternatively, flash forward to today, and if everyone had to go home from work as their last day forever, we could evolve into poverty and worse, right? If the mortgage is not paid, the bank will give you time—Note: time is priceless; hug your family/friends—but after a little time, they need the house back because the house costs money that you haven’t given back yet, right? And etc., etc., etc. Most of us know or can accurately guess what that timeline or future looks like. That is the model of job cuts or removal we have been using for quite some time and is known.

But the truth is, this is not massive job cuts for the economy, or even a “D.” like in the 1940s. This is a “WE ARE FREE FOREVER” “(BOOM ❤️),” and the economy does not need or require human inputs of Labor or Time. And just as sure as our beloved Martha Stewart went to prison, this too shall pass, I can say with as much certainty as possible of something that is still in the future, of course.

Now, check this out. If we claim that this is happening because, “Heck, did Martha Stewart go to prison even with all of our support? This is a real thing, and these robust business/money laws exist, and they work really well,” then, once claimed, or at least understood as what is coming for us—for a respected, among-the-Wall-Street-market-maker-types colleague of mine, economist, actually economic wonk, is probably more accurate 🙂, like myself, this is super “(BOOM ❤️)” and uber exciting. I mean, we have been pushing this rock up the hill a long time, also known as working jk jk jk, for a long time, in my book. And the economy we have now, at least for the last 50 years, has been providing less and less and less comfort every decade, at minimum, anyways.

Looping back around to what we need to check so we—the entire global all people—can do this everywhere. But I see the implementation we drive and support as an American-only model. We are *Atlantis Re-done, of course, akin to young children, usually males, who play the game “do you know this one” and share the motions of a skateboard trick or a cartwheel. We would share with our distant cousins through the Western world and let them catch up if they do the flip or skateboard ollie that we showed them the motions of, to maintain the example. But this is *Atlantis Re-done. This is America, and this future, if we want “WE ARE FREE” “(BOOM ❤️)” over a “D.” 1940 or something different, maybe something a little less uncomfortable like an “R.,” is, in fact, here to such a degree that one could say without fail.

Now, we all “know people,” right? We are all, in fact, a bunch of humans running around this community, not too different from, yes, the long-ago Hammurabi’s Code and community. “BOOM BOOM BOOM,” back in my estimation, 1 gazillion quadrillion bazillion years ago 🙂, when we clocked in and started playing this game of economy that required, without fail, the inputs of 1.) Human Labor and 2.) Human Time, also known as everyone’s favorite pastime, “Working” (jk jk jk). Everyone’s favorite pastime, from what I can tell, is their kids, right… for the most part jk jk jk. I will confirm that part once I have a brood, but that is the strong impression I get from our culture and community.

Fun Note: the kids of my community here in West Hollywood and LA call me “Cool Dad”… baby face here, and they thought I was their age. I was first shocked and had to correct them because I’m a 40-year-old guy (🎶🎶🎶 Not like us… Not like us 🎶🎶🎶). And then, second, they named me “Cool Dad.” I am proud that Gen Z thinks I’M COOL. THIS IS AWESOME 🤩😎!!

Returning to the fact that we are all, in fact, a bunch of humans in a community, which thus makes us people. Control how you want to move, deliver, and provide throughout this “BOOM BOOM BOOM forward to the future.”

I am of the motivation now, and probably have been for a while, that—and this is very important to understand:

If God wanted to show that person, He would have, or He will, at or on His time. And further, I am not, and do not, force our Lord in Heaven’s hand/work/mission/filling of their chalice. That is His work, and let Him go, Him control, and me follow as per His direction via, for some, maybe the Bible or Torah, etc.

I believe this approach is wisest and, in fact, not harmful or uncaring of my fellow man that I walk with, because in my opinion, as right as rain that our beloved Martha Stewart, in fact, went to prison even with all our love; so too will this change in required inputs to run our economy, almost exactly as we have built today, and how our future economy, which will again look very much almost exactly like what we have today, minus humans, i.e., our community pushing the big boulder, sometimes with spikes or sharp edges, or sometimes it rolls back down the hill, up the mountain, until we are 10 years away from meeting that Lord in Heaven.

**“WE ARE FREE FOREVER AND EVER”**

**“BOOM ❤️”**

I am right now simply keeping my head down, building, working hard, being on time for work religiously, learning as I see fit, and with that learning, seeing what God wants me to see. We are "BOOMING," i.e., MIND BLOWN, right now. Let's see what God wants you to bring forward. That may look actually internal, as an inside understanding of an idea, concept, or anything. This is my approach. It's pretty cool coming from "COOL DAD!!! 😎," in my estimation, but I leave you with one note: You can break the idea that I have laid down here for you today based on "WE ARE FREE FOREVER AND EVER PLUS STILL GET HEAVEN ❤️." However, as soon as you start acting or bringing forward, via your actions in any space, public or private, your personal "people," as we are all, in fact, "people," that will be what we, as a community, get, in my opinion.

Excuse the language—no children around—the shitty cow dung, but you still have to eat it for lunch and dinner and with an extra big smile. An extra big smile to uplift/support the emotional intelligence of your children, because the violation of the "WE ARE FREE" approach is almost how we are actually living today. Our work, community, and culture, almost to the highest degree, are the ultimate version of "you know people… I know people," and this is how we today hold it, claim it, and drive it forward. Today's culture, going back all 250 years, is a future that is, in all honesty, completely believable and probably the best the government could do if "WE ARE FREE ❤️" "BOOM" (MIND BLOWN) today, or even 15 years from now, which is not a thing. The horizon and sunrise are close.

My impression, and most who share theirs, is that everything to almost everything is complete shit today, unfortunately, and this is them, the government, selling us good times. No education provided, no clean water, air, time with our family, or even a chicken in every pot 🇺🇸. But you know governments… I know government. So let's not buck up on stupid and remember TOILET PAPER 🥲 if you need a guide. 🙂

I'll share more later. We are all adults here, so do what you have to do, but I'm using head-down mode, on-time-to-work mode, and learning-whatever-I-want mode to grow, understand, and drive into our "BOOM ❤️" future, which is coming like Martha Stewart went to PRISON. My personal flavor and patriotism to:

"What, me? Don Foster… economic wonk to the top. I said F*** that job twice, and it's couch 🙂. I do not like rocks or hills anyways, and I will be clocked out FOREVER AND EVER AND EVER PLUS STILL GET HEAVEN TIME BOOM ❤️."

I personally would never curse, so I use ** jk jk, but I'm sure you can recognize and sense how nice this will be. "WE ARE FREE" "BOOM ❤️" (MIND BLOWN) is going to come through, hopefully with a lot of extra great, enjoyable surprises from that Lord in Heaven.

Regards, Don Foster

Move with purpose. Move as one. You know your neighbor. You know your environment. Drive forward your movement with purpose, in harmony with whatever you are driving.
